For those who yet do not know how to unwrap a model , basically making 1 texture to be placed around an object instead of 3-4 or more, so for all that have been crying out for help ive decided to make a video for you all.

Sorry if Quality is a little bad, this is due to me compressing it from 176MB, I hope you give back good feedback.

Here is the download URL:

Enjoy.

Well, only last hope would be to download it again, extract it to a local folder and see if it will work, it works for others.
