I joined Swami Flying Circus server and entered a game in course on Mesa. After a few seconds someone ask for harvester healing but it wasn't anywhere. I could hear its sound but it was invisible. I figured where it was because the Refinery dock opened. I've never seen anything like that before. Now I wonder what happened, since in the next game, the harvester was visible.

Just one of renegade's little bugs - nothing to worry about.

I believe that happens at rare occasions once you've lost your powerplant.

npsmith82Just one of renegade's little bugs - nothing to worry about.

I believe that happens at rare occasions once you've lost your powerplant.

Ok, I'm not worried...It's just weird coz, like I said, I didn't see stuffs like that in almost 2k games, since Feb 2002.

I believe that happens at rare occasions once you've lost your powerplant.

Ok, I'm not worried...It's just weird coz, like I said, I didn't see stuffs like that in almost 2k games, since Feb 2002.

Actually, i've not seen it for a very long time... we used to see it quite frequently.

I'm not sure if one of the previous patches made the bug less likely or something?

It happens whenever Nod's power plant has been destroyed. Whether the harvester continues to harvest or not after the power plant dies is solely dependant upon the existance of a waypath from the airstrip to the Tiberium field.

Concurred. It happens every time the Power Plant dies. The existing harvester is visible but if it's destroyed the new one is invisible.

Yeah. It's not worrying but it's... weird. I thought WW patches have fixed it, but the bug still happens

i hate invisibal havrys, cuz then you cant see it wan when you rush you might run into it and get killed while trying to get free

---

dont you hate whe that happens

I once made it happen by slamming the harvy with a tank while it was docked. It disappeared (not invis but totaly gone) and the arms stayed deployed. Lucky it was only a 1 player lan or I might have had a mad team.

A well know bug since the beginning and I figured out the full cause after the second patch. I send a screen shot and the cause to WW but they did not fix it with 1.036 or 1.037 patch.
