I can only host agame with two players inside how can i change this?

O and setting my connection to t1 doesn't help either.
And when i host a game for 4 players than when the fourth comes in the connection stops and
quits

Please help

Your connection may not be able to handle 4 players. I have 256KBit upstream on my ADSL and I
can only host a 4 player server and if you have cable then your likely to be only able to host 2
players if you have a 128KBit upstream.

Huh? So what are all these 32-player servers hosted on then?
