It's down alot, it really sucks.

Ya wanna know what spam is, its a post that basically has Nothing to do with what the forum is based around, Floods the servers, etc. What you have just posted can also be considered spam. Wild1 was simply acknowledging what i had said.

Any way... does anyone know the current status of RenAlert? I heard it was being released in the next few days?

Actually, chances are he was kinda doing what we Brits call "taking the fucking piss" and not just acknowledging what you wrote, as indicated by the :rolleyes: at the end. This is often used by people as a way of indicating they're being sarcastic.

I just don't know why you would post something like this. If you would have looked around at the other Arm-Ent sites, you whould know they were down too. So put 2 and 2 together.

Yeah, there are some people who post too much pointless topics. For example some asked the other day if C&C Reborn had a website. If you go to google or another search engine and type in "C&C Reborn" guess what it comes up with. Same with searching for "Renegade Tutorials" you get the information that you get here most of the time and if you don't get what your looking for then post a topic. No offence to people who really do need help or know something but use common sense first and have a look for yourself.

One of the sites that Arm-Ent hosts is being DOSed. I have no further information.

Basically that means the whole of arm-ent is down because some n00b is probably DOSing the Renalert or other hosted site.

So its kinda like what happened to n00bstories not too long ago. I don't even know why you guys are worrying, Ren Alert still has to be compiled, so that will take a while, and Arm-Ent will be back up eventually. No big deal. Lefty, remember that prank you guys pulled last year, by saying Ren Realm was closed down By the FBI or something. That scared the shit out of me, but I've learned now.

Hey that was this year. I only joined the Renegade community in December and I remember when they did that prank. How time flies.
