Is there some sort of a program I can use during renegade to detect someones Ip adres, this will explain, who's IP I want, and why I want it.

http://www.n00bstories.com/n00bfile_view.php?id=3699 we are going to ban his IP from both of our servers, also is there a way to ignoe incoming messages on renegade if we find out his IP?

I think he means ban his IP from sending him pages. I don't know how to do that.

If he has a dynamic IP then it will cause more harm than good. This means that his ISP have a DHCP (Dynamic Host Configuration Protocol) server which gives him a new IP either everythime he connects or it refreshes every so often. If you ban an IP that he has the chances are the next time someone who used his ISP logs on the DHCP server may give them the banned IP. Although it may not be likely that another person on his ISP plays on the server it hasn't solved your problem.

Unless someone is using a static IP (as most cable-modem connections have) the IP ban won't work anyway. The user closes down his connection, dials in again and got a new IP....^^

Damn, ohh well, I'll just have to keep, banning all his accounts from our server, and block all his accounts from sending us messages.

Just ban his ip are like say every name he uses is 12.123.123.###, i think in the fds you can put 12.123.123.xxx and it will ban anyone with those first 3.

Here are all the nicks and IP's for that player that have been on The Pits server

lemursucs:68.119.245.26

vapochil:68.119.245.26

vapoman:68.119.245.26

gmcrod:68.119.245.26

This is one more player on the same Class C subnet. It may or may not be the same player. If it is, then they don't have a dynamic IP address and all you can do is ban the nicknames

spngbobpc:68.119.245.187

Xtrm2MattYou can't.

yes there is a way, i dont no how but i no there is a way. I was in a clan game awhile back and i was talking all this crap to that slickpat guy (wrong guy to fuck with right) anyway he threatened to hack me and i said to him "whats my ip" and sure enough he gave me my ip and everyone eles from my clan that was in the game...

Imfao

slickpat isnt a hacker, he scripted a mirc addon called WOLScript which is a spin off from the relay, works on the same connection process.

Once you connect you just do a simple command to get anyone's IP who is connected to the same WOL server ie Renegade US

lol hacker Imfao

Hahaha

That was funny

Hey, here is a solution, just ban the immideate ip range.
68.119.245.* ban that.
