I came across this article:

http://www.sof2files.com/file.stuff?body=PBInterview

Quote:

"we have discovered that the only effective approach involves direct integration with the game (i.e. a separate third-party program just has too many loopholes)."

Does RenGuard have any plans to perform a direct intergration with Renegade?

Thanks,
Gib.

Of course Renguard will have a certain level of interaction with Renegade, but integration (seamless, and smooth integration) is not possible without viewing the source for Renegade.

But the games PunkBuster is protecting has cheats that work very differently. The cheats that give us problems are very simple and only require a very simple solution, avoiding most loopholes and eradicating most cheaters.
