I was just wondering if anybody knew how to import the wol rankings for a certain player in to a php script...

I dont want to go create some script to display rankings, we already have a perfect one.

It is just bugging me...

So if anybody knows please pm, email or tell me in some way.

If not I guess my mind can stand the blow

~Sk8rRIMuk

Note: It is more mod related than general disscusion related so it was a toss up between which forum to post it in.

I imagine you could do some kinda HTML parsing on the renchat4.westwood.com pages... no?

I never thought of parsing the html pages, you would still be linking to the WOL database but just getting your results via a parsed html page.

There are better ways I am sure...

Well, that's the cheap & cheerful method.

Just speak with Dante, he's worked out a way to put it into PHP with his signature images...

Well the rankings must be working first.
They are a bit fucked up now. Especially the clan rankings.
