You are all idiots.

Go bash something else, go jump on another bandwagon...

Sheesh. It's getting old already.

You don't have to read it, homoboy... You do realize that, right? Everything here isn't forced upon you to read.

So if you don't want to read it... You could, gasp, not spend so much time online and not respond to it?

OT: Can I start a topic about RenAlert bashing then?

If I did, I can guess which one would get deleted/locked/moved first.

I have never played Reborn or RenAlert.

My understanding is that they both have their strengths and weaknesses.

Since this is a "Bash Reborn" thread, someone give me the 'elevator' version, and give me the one or two biggest flaws in the mod.

Reborn has glaring, game-impeding problems that RenAlert, simply, does not. If they ever FIX Reborn, it'll be good, but for the moment, it blows goats.

Classless, but not uncharacteristic.

I was hoping my frownie face would stop this, but I guess I'll have to lock it instead.

Go bash Reborn on other forums, but not these.
