Read and apply the reinstallation of Renegade in this topic:

http://www.renegadeforums.com/viewtopic.php?t=9790

and then dare tell me it didnt work

It will ALWAYS work this way if you do exactly how its written.

Check your firewall settings. This will happen if RenGuard is unable to connect to get a server list.

Reead your firewalls manual/help on how to grant programs internet connection rights.

In zonealarm you click on the "Programs" Tab at the left, there you can add 'game.exe' to the list of programs and set it to allow access.
