Allo all,

Just wondering... Perphaps Crimson and mac would would be kind enough to implement a feature that detects whether or not a server is running pure mode. If it is, it renames all skins to something that rendesr them useless (ie for "hud_main.dds" it could be "hud_main.dds.rg") and then block any that are then renamed to .dds as cheat files. Obviously when exiting a server RG would rename the fiels back to a useful form.

Hope this is possible, Cas

This will not work im affraid.
You cannot switch skins while renegade is running, you would have to restart renegade to apply this.

My advice: Just keep your original skins only and you can join ALL RenGuard servers without any problems.
