Hi ,

I have Installed Rengaurd and it works the first 2 days and now he everytime says you need rengarud and i have installed it and its an.

And i join an Server and it works 1 time and i rejoin and says no rengaurd.

I have now Reinstalled Renegade and rengarud and wol an nothing added and the problem won't solved :S

I am bored without renegade I can't go in TnTServ anymore because i have trouble with rengaurd what can i now do ?

Tell your admin to update to brenbot 1.34/ssc 1.01 .. It's a server side thing that has been fixed!

Most have not upgraded yet. Server should run brenbot 1.34/ssc 1.01 .. then it'll work.

Also, be sure only to start renegade when you actually see the motd. Not before that. We will address this in the 1.01 update.

Thx

I will tell it to the server administrator
