Hi,

I just launched renegade and it updated renguard to version 1.01. I rebooted my pc and when it finished loading I started renegade. It begins to launch renguard but I get the following error message:

//START

game.exe has encountered a problem and needs to close. We are sorry for the inconvenience.

If you were in the middle of something, the information you were working on might be lost.

For more information about this error, click here.

//END

When I click on the "click here" link I get this:

//START2

Error signature
AppName: game.exe AppVer 0.0.0.0 ModName: ntdll.dll
ModVer: 5.1.2600.1217 Offset: 000085c0

//END2

Any advice on how to fix this would be appreciated. [/b]

I have advice for you Weesheep... Now read carefully... I'm looking for you, and I'm gonna get a Ramjet right into either Havoc's Balls or Sakura's tits... If not, one right the centre of a 500

Sniper... You've been warned... Avoid me bitch :rolleyes: lol...

Anyway I don't know about the update but if I were you I'd get rid of it and just stick to normal RenGuard...

Oh yeah and click here, this should solve your problem!
